

Point-to-point response

Dear Editor:

Subject: Submission of revised paper "Cross electro-nape-acupuncture ameliorates cerebral hemorrhage-induced brain damage by inhibiting necroptosis"

Thank you for your email dated enclosing the reviewers' comments. We have carefully reviewed the comments and have revised the manuscript accordingly. Our responses are given in a point-by-point manner below.

We hope the revised version is now suitable for publication and look forward to hearing from you in due course.

Sincerely,

Kun-Ping Jia

Reviewer #1: A very well documented experimental work with a detailed methodology on a topic of increasing in both scientific and public interest. The experimental scheme is presented with a specific order that enable its repetition and reproduction, facilitating the assessment of the comparative results that justify its conclusions I suggest the authors consult my research entitled "Energetic Death", presented at the INAIT-2019 Congress at Oxford University. Said work is aligned with the concepts of apoptosis and necroptosis and covers the in vitro section related with currently asked questions about mechanisms of cell signaling to subdue apoptosis or proliferation. Dr AdriáAngel Inchauspe

Reply: We are all grateful for your careful review and kind suggestion. Recently, we had read the related article you mentioned, and learned a lot from it. Cell death is a hot issue participating in pathogenesis of multiple diseases. We will further investigate the underlying mechanism of cell death by combining your article.
