ANSWERING EDITOR AND REVIEWERS

Dear Editor,

We have answered all the concerns concerning the manuscript 52456 for World Journal of Transplantation. In particular:

The conflict of interest declaration has been enclosed

The audio core tip has been enclosed as mp3 file

All others requested files are enclosed

Figures are now in JPEG as requested

The certification of American Journal Experts is enclosed because of no English speaking authors

You have now the manuscript in two different colors. Black is the original, red answering reviewer's comments

Reviewer's code: 03291363

Table listing all the established improved outcomes using pharmacogenetics (done by authors)

Table 8 is now being added

Several tables lack references

All tables have now the relative references and new references have been added

Explanation of how LOR and QOE are defined

The explanation has given in the text at pg 10

A greater explanation of the meaning of GWAS is required

The greater explanation has been added at pg 6

A reference for tacrolimus delivering better outcomes than CsA is required

Reference 33 has been added

An explanation on page 8 as to why a higher rejection rate was found if the tacrolimus level was possibly higher

The explanation has been added at page 8

Reviewer's code: 0272601

The article omits what are its objects

This issue is now clarified at page 7

Lot of names of genes difficult to memorize or learn

Please look at the new table 8 and the relatives new reference

Comments of the French and Netherlands trials and how they implement our information

Please look at page 11 and page 17

Genotyping patients may be more academic than a clinical necessity

Please look at the new table 8 and the reference 76

No difference in the evolution of patients genotyped versus not genotyped?

Not always. In several cases nephrotoxicity and CAN have been documented in patients not genotyped. Please see again table 8

Pharmacogenetics and relevance of dosing immunosuppressants in blood

Pharmacogenetics and blood levels are the two faces of the same coin. In some cases dosing blood levels is essential, in other cases as MMF is not necessary

Reviewer's code: 0050314

We thank you for your positive comments
