Effective combined therapy for pulmonary epithelioid
hemangioendothelioma: A case report

Zhang XQ *et al.* A P-EHE case

Xiu-Qin Zhang, Heng Chen, Shu Song, Yan Qin, Li-Ming Cai, Fang Zhang

Abstract

BACKGROUND

Pulmonary epithelioid hemangioendothelioma (P-EHE) is a rare disease. Thus far, consensus on a standard treatment for P-EHE has not been established given its low incidence worldwide. Apatinib-combined chemotherapy with doxorubicin/cyclophosphamide has been used as an effective combination treatment for human malignancies. However, the efficacy of this combination has not been reported in P-EHE cases.
