Dear Editor:

Thank you for your kind handling of our manuscript 54400. We would also like to thank the reviewers for taking the time to provide us with their kind feedback and constructive suggestions. We have revised the manuscript according to the comments and suggestions outlined below. We appreciate the opportunity to publish in your esteemed and well-respected journal, "World Journal of Clinical Cases." We hope the revised version meets your satisfaction and is accepted for publication. Once again, thank you for giving us the opportunity to share this rare case report with your audience.

Sincerely,

Sara Ghoneim

It is an interesting and well-written case report. Suggestions: - I believe that "extremely" should be removed from the title. - I believe that the table can be presented in the introduction and not in the discussion. - The text must mention approval by an ethics committee.

Answer: Thank you for your kind review. We have removed "extremely" from the title. The new title is: **"Isolated colonic neurofibroma, a rare tumor: case report and review of literature."** We have presented the table in the introduction section as per your request. We included a statement on the first page to mention approval by our institution's ethics committee for publishing this case report.

-Add more on the basic of this disease in the introduction -Discuss role of imaging using these ref -Abd-El Khalek Abd-ALRazek A, Fahmy DM. Diagnostic Value of Diffusion-Weighted Imaging and Apparent Diffusion Coefficient in Assessment of the Activity of Crohn Disease: 1.5 or 3 T. J Comput Assist Tomogr 2018;42:688-696. -Abdel Razek AA, Abu Zeid MM, Bilal M, Abdel Wahab NM. Virtual CT colonoscopy versus conventional colonoscopy: a prospective study. Hepatogastroenterology 2005;52:1698-702. -English language correction through the manuscript -Discuss merits and limitations of technique applied -Discuss the neurogenic tumor in patients with neurofibrositis using this ref -Razek AAKA. MR imaging of neoplastic and non-neoplastic lesions of the brain and spine in neurofibromatosis type I. Neurol Sci 2018;39:821-827. -Update of references as most of references are old

Answer: Thank you for your constructive feedback. The references you provided helped improve the manuscript further. We included these references per your request and updated our reference list. The references you provided are cited as (3,26,27). We added more information regarded the basics of this disease in the introduction section. Neurogenic tumors were mentioned in the introduction and discussion sections. We also discussed the available imaging modalities. Some references had to stay old, because they are listing **previous case reports** that mention isolated colonic neurofibromas [ref 8-23]. Please refer to Table 1 to see why we included old references [ref 8-23]. Lastly, we revised the manuscript to ensure there are no typographical errors. We hope you enjoy our case report.
