#### **SPECIFIC COMMENTS TO AUTHORS**

This is a well written and easy to read manuscript which describes the potential reasons for long term graft loss after solid organ transplantation with special attention to metabolic syndrome. I have one comment on a sentence under the 'Dyslipidemia' section: It says that Ezetimibe may be considered in recipients who do not tolerate statins, although no efficacy data are available for this drug. However, there are studies related to this in the literature. I recommend the authors check those out before concluding. Almutairi F, Peterson TC, Molinari M, Walsh MJ, Alwayn I, Peltekian KM. Safety and effectiveness of ezetimibe in liver transplant recipients with hypercholesterolemia. *Liver Transpl.* 2009;15(5):504-508. doi:10.1002/lt.21710
