
This document (***SGLT2 inhibitors' mechanisms of action in heart failure***) has been proofread and edited by a native-speaking translator and interpreter for the English, French and Italian languages, focusing on the correction of any improper grammar and spelling, as well as the correct use of articles, abbreviations, fonts, punctuation and prepositions.

The court interpreter who has performed the editing confirms that the document has the highest level of language proficiency.

Luka Fleković
Court interpreter for the English, Italian and French languages
