## Serum Phosphorus as a Risk Factor of Metabolic Syndrome ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6835508>

We demonstrated serum phosphorus concentration to be a risk of diabetes mellitus in the elderly, which was consistent with the previous study . Serum phosphorus concentration might also be associated with fasting sugar concentration in the elderly (Table 3). Furthermore, our results showed the serum phosphorus concentration to be an important risk of MetS and its components, including BMI, serum HDL, serum triglyceride, and fast plasma glucose in the elderly ...

## Association of Serum Phosphorus Concentration with ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3735629>

Lorenzo et al 56 have reported that the relatively low serum phosphorus concentrations seen in older MHD patients were associated with a spontaneous reduction of protein intake and the relatively low caloric and protein intake is common in elderly MHD patients. 59,60 Poor appetite and low protein intake significantly correlated with increased ...

**Importance of serum phosphate in elderly patients with diabetes mellitus**

Vaia D Raikou, Despina Kyriaki, Sotiris Gavriil

**Abstract**

**BACKGROUND**

Metabolic disturbances including changes in serum calcium, magnesium or phosphate influence the prevalence of type 2 diabetes mellitus (DM). We considered the importance of serum phosphate (P) in elderly patients with type 2 DM *vs* non-diabetes mellitus (non-DM) in relation to the renal function.
