

To World Journal of Gastroenterology

Regarding the manuscript:

"Severe steroid refractory gastritis induced by Nivolumab – a case report"

Manuscript NO: 54577

Dear Editor

We thank all the reviewers for reviewing our manuscript and for the valuable comments. We have evaluated the comments and made minor revisions to the manuscript accordingly.

We thank the editor for the opportunity to submit a revised manuscript.

Reviewer 1 (code 03441297)

Thank you for the comments and for finding this case report relevant for clinical practice.

Reviewer 2 (code 01467898)

Thank you for the comments. The 'p' has been changed in *Helicobacter pylori*.

Reviewer 3 (code 02728466)

Thank you for the comments on this case report. They have been taken under consideration. Hopefully now all abbreviations are explained.

Regarding the recommendation on presenting the case in fewer paragraphs, the current form is due to requirements from the "World Journal of Gastroenterology" and for that reason, it has not been changed.

The recommended paper *Călugăreanu et al.* is indeed relevant as a case and is now included in the discussion among the other cases.

Regarding the second recommended paper *Iranzo et al.*, it is an interesting paper and could be included, however it mainly refers to two other papers *Marthey et al.* and *Collins et al.* *Marthey et al.* is already included in this case report. *Collins et al.* has now been included in the discussion. In the discussion we mainly focus on the histological pattern more than the endoscopic pattern. In order not to make the discussion too comprehensive, the *Iranzo et al.* has not been included in the revised manuscript.

We hope the revised manuscript meets the criteria for publication in "World Journal of Gastroenterology".

Sincerely,

Helene Hjorth Vindum
