## Evaluation of radioactive 125 I seed implantation for the ...

<https://bmccancer.biomedcentral.com/articles/10.1186/s12885-020-07223-3> ▾

125 I seed implantation assisted by a 3D template has become an effective means for the treatment of advanced malignant tumours, especially in the treatment of refractory malignant tumours, including brain metastases, pancreatic cancer, and soft tissue tumours, as well as advanced tumours with post-operative recurrence and metastasis [1,2,3,4].

## Efficacy of Iodine-125 Seed Implantation in Locoregionally ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6330559>

The management of locoregionally recurrent and unresectable breast cancer is a therapeutic challenge. This retrospective study aimed to assess the efficacy of 125 I seed implantation brachytherapy as a palliative management in locoregionally recurrent breast cancer. We analyzed 36 locoregionally recurrent and unresectable breast cancers in our hospital between 2012 and 2016.
