SPECIFIC COMMENTS TO AUTHORS

This is a perspective regarding the management of cystic fibrosis-related diabetes (CFRD). The manuscript is overall concisely and well written. There are some comments.

1. Figure only describes the effects on beta and alpha cells. Please describe the interactions with exocrine pancreas and peripheral tissues more comprehensively. 2. GLP-1RAs may have some (adverse) effects on exocrine pancreas. This possibility should be more precisely discussed. 3. The authors mention only GLP-1RAs. But DPP-4 inhibitors and SGLT2 inhibitors as well as metformin are also candidates of treatment options for CFRD. This point should be more clearly discussed.

SPECIFIC COMMENTS TO AUTHORS

It is an interesting manuscript. Authors succeed to present their data in a clear way adding information to the existing literature. Therefore, I have no corrections to do and the manuscript can be published unaltered.
