

## ANSWERING REVIEWERS

Nov 3, 2013

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 5471-case report.doc).

**Title: Clitoris metastasis from a retroperitoneal leiomyosarcoma: A case report**

**Author:** Suna Cokmert, Lutfiye Demir, Murat Akyol, Ibrahim Vedat Bayoglu, Alper Can, Ilkay Tugba Unek, Filiz Aka Bolat.

**Name of Journal:** *World Journal of Clinical Oncology*

**ESPS Manuscript NO:** 5471

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) *Reviewed by 00061154:* **Needed much editing, which I did. 1-2 references were not entirely quoted correctly.**

**\*\*Thank you for your evaluation and for your editing. The corrections were made on manuscript. Furthermore, manuscript was proofreaded by professional English language editing company (American Journal Experts)**

**\*\*1-2 references were altered for the information fully prove.**

(2) *Reviewed by 01332768:* **The authors observed a clitoris metastasis originated from retroperitoneal leiomyosarcoma. This is a very interesting case and should be published so that the observation can be shared with colleagues in the field. Just say, there is a small error in page 2, line 2 from the button, "salpingho-oophorectomy" should be "salpingo-oophorectomy".**

Thank you for your evaluation. The correction was made on manuscript.

(3) *Reviewed by 02456028:* **There are several issues need to be addressed. 1. The abstract seems to address metastatic tumors of the clitoris too much and neglect the part of retroperitoneal leiomyosarcoma. It can not summarize this case report very well. It's better to revise the abstract and stress the clitoral metastasis "from retroperitoneal leiomyosarcoma". 2. The sixth to eighth lines of introduction part "The liver and lungs are the most common sites-----within the first five years." need references. 3. There are some spelling mistakes in the article, such as the second line from the bottom of page 1: salpingho-oophorectomy. 4. Figure 1 is not very clear. 5. The scale of Figure 2 is a little strange. The length-width ratio of the first 2 figures is too different from the third one.**

1.) Thank you for your evaluation.

The abstract was revised according to your accurate detection.

2.) “The liver and lungs are the most common sites-----within the first five years”

The sentence was corrected and the references were added.

3.) Spelling mistakes were profreaded.

4. and 5.) Figure 1 and Figure 2 were corrected according to your detection

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Clinical Oncology*.

Sincerely yours,
