Is there a role for treatment-oriented surgery in liver metastases from gastric cancer?

Uggeri F *et al.* The role of surgery in gastric cancer liver metastases

Fabio Uggeri, Lorenzo Ripamonti, Enrico Pinotti, Mauro Alessandro Scotti, Simone Famularo, Mattia Garancini, Luca Gianotti, Marco Braga, Fabrizio Romano

Abstract

BACKGROUND

Distant metastases are found in approximately 35% of patients with gastric cancer at their first clinical observation, and of these, 4%-14% involves the

[Is there a role for treatment-oriented surgery in stage IV ...](#)

<https://www.ncbi.nlm.nih.gov/pubmed/30039281>

Stage IV **gastric cancer** is classified into four subcategories: positive peritoneal cytology without clear **macroscopic peritoneal involvement** (**surgery** is usually performed in these cases); gross appearance peritoneal carcinomatosis [**surgery**, eventually with hyperthermic intraoperative peritoneal chemotherapy (HIPEC) may be considered in very selected cases with limited PCI]; nodal **metastases** outside the **loco-regional nodes** (**surgery** may not be denied for **metastatic** ...

[Surgery for Liver Metastases From Gastric Cancer](#)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4616574>

The **role of surgical therapy** in patients with **liver metastases** from **gastric cancer** is still controversial. In this study, we investigated the results obtained with local **treatment** of **hepatic metastases** in patients with **gastric cancer**, by performing a systematic literature review and **meta-analysis**.
