Pancreatic Arteriovenous Malformation: a case report and ...

Aug 1, 2011 - Multiple feeding vessels are often associated with early portal vein opacification. ... Multiple feeding vessels may preclude **embolization**. The differential diagnosis for **pancreatic arteriovenous malformation** is primarily hypervascular tumors such as islet cell tumors, and hypervascular metastases.

Arteriovenous malformation of the pancreas: A case report ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2728924>

Extrahepatic arteriovenous malformations (AVMs) of the **gastrointestinal (GI)** tract are rare and mostly congenital anomalies. They are usually asymptomatic but may present with portal hypertension in the absence of primary liver pathology. They are also rare causes of **massive GI bleeding**.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3303456>

Aug 01, 2011 · Rarely, an atypical appearance of **chronic pancreatitis**, or an **intrapancreatic accessory spleen** may **mimick pancreatic arteriovenous malformation**. Treatment of symptomatic patients, including patients with varices and gastrointestinal bleeding has included **arterial embolization**, **transjugular intrahepatic portosystemic shunting (TIPS)**, **vascular ligation** and **pancreatic resection**.

Arteriovenous malformation of the pancreas: a case report

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4735097>

Feb 01, 2016 · **Arteriovenous malformation (AVM)** of the **pancreas** is uncommon in the gastrointestinal tract. We present a **case of AVM** of the **pancreatic head** in a 59-year-old male. He was admitted to a hospital with hematemesis and tarry stool and referred to our hospital in March 2014 on the diagnosis of **pancreatic artery pseudoaneurysm**.
