

Dear Reviewers:

Thank you for the opportunity to revise our manuscript entitled “Embolization of Pancreatic Arteriovenous Malformation : A Case Report”. The comments are valuable and helpful for revising and improving our paper. We have carefully studied the reviewers’ critical comments and suggestions, responded to these comments point-by-point, and revised the manuscript accordingly.

**1. Reviewer’s code: 03552382**

: Recommend to add the unusual complication such as psuedoaneurysm of splenic artery during acute pancreatitis in discussion.

➔ We addressed pseudoaneurysm of the splenic artery as a complication of acute pancreatitis; this is a rare but important complication. We also referred to recent journals about pseudoaneurysm of the splenic artery and added the journal articles to the reference list.

**2. Reviewer’s code: 03667297**

: Recommend to need language polishing, need better representing images and need to write more detail legends.

➔ We performed English correction once again and checked spelling and grammar mistakes in our manuscript.

We readjusted the imaging quality of the figures in the paper, added the missing signs in the figures, and described the descriptions of figures in more detail.

**3. Reviewer’s code: 00068781**

: Recommend to check grammar mistakes and language polishing, edit image quality & Point out that some references in our manuscript are too old.

➔ We have referred to the more recently published papers on pancreatic arteriovenous malformation.

We performed English correction once again and checked spelling and grammar mistakes in our manuscript.

We readjusted the imaging quality of the figures in the paper, added the missing signs in the figures, and described the descriptions of figures in more detail.
