Title: The Geoeidemiologic Variation in Outcomes of Primary Sclerosing Cholangitis

Reviewer's code: 03261272

Position: Peer Reviewer

SPECIFIC COMMENTS TO AUTHORS

The authors reviewed the geoeidemiologic variation in the outcomes of PSC. This article is well written and the information is valuable for clinical practice.

Authors Response: Thank you for these kind words. We hope the readership enjoys the manuscript and finds it clinically interesting and informative as well.

Title: The Geoeidemiologic Variation in Outcomes of Primary Sclerosing Cholangitis

Reviewer's code: 03475479

Position: Editorial Board

SPECIFIC COMMENTS TO AUTHORS

Authors reviewed the geoeidemiologic variation of PSC. This review was interesting and well-written. As authors mentioned, geographic variation was found in PSC. I recommend that geographic variation in age and concomitant IBD also should be summarized as Table.

Authors Response: Thank you for the positive and constructive feedback and for your suggestion as to including a summary of the variation in age and concomitant IBD in table form. We have updated Table 1 to include this information and embedded it inside the revised manuscript.
