Nov 14, 2014 · Paratesticular embryonal rhabdomyosarcoma (RMS) is a rare tumor arising from the mesenchymal tissues of the spermatic cord, epididymis, testis and testicular tunics. We report three cases of adult paratesticular RMS, two embryonic and one pleomorphic rhabdomyosarcoma. All the patients underwent diagnostic orchidectomy.

Liposarcoma of the spermatic cord: A case report

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4514508>

Jul 17, 2015 · Spermatic cord liposarcoma is very rare and characterized by a painless inguinal or scrotal mass. This is a case report of a 66-year-old man presenting with a mass in his left scrotum. Inguinal orchiectomy was performed and the histopathological examination revealed a liposarcoma of the spermatic cord.

Pleomorphic rhabdomyosarcoma of spermatic cord and a secondary hydrocele testis: A case report

Xin Chen, Ci Zou, Chao Yang, Liang Gao, Liang-Kuan Bi, Dong-Dong Xie, De-Xin Yu

Abstract

BACKGROUND

Pleomorphic rhabdomyosarcoma (RMS) of spermatic cord is a group of rare neoplasms, and a secondary hydrocele testis occasionally occurs. The misdiagnosis of paratesticular mass may lead a therapeutic delay.
