

## **ANSWERING REVIEWERS**

**Name of journal:** World Journal of Cardiology

**Manuscript NO:** 55071

**Title:** Cardiovascular magnetic resonance in myocardial infarction with non-obstructive coronary arteries patients: a review

### **Reply to editorial comments:**

(1) The “Author Contributions” section is missing. Please provide the author contributions;

*Based on the instruction provided in the authors guideline we reported the “authors contribution” in the appropriate section.*

(2) The authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor.

*Based on the instruction provided in the authors guideline we uploaded the figure in pptx. in the file “(9) 55071-Image File”*

(3) Some parts of the manuscript should be revised according to the CrossCheck report.

*We modified the text accordingly to the CrossCheck report. We remain available for any further correction needed.*

### **Reply to reviewers’ comments:**

The paper entitled “Cardiovascular magnetic resonance in myocardial infarction with non-obstructive coronary arteries patients: a review” is an excellent one, showing that CMR plays a key role in MINOCA patients. for evaluation and stratification of the cases, and is an essential tool for prognosis This study brings additional knowledge in the field and encourages to make better research in this field. As a peer reviewer, I do not have any further concerns

*Thank you for your comment. We hope that our paper will be useful to all the clinicians, cardiologists and radiologists who will read it.*
