Multiple carcinosarcomas of the esophagus with adeno-carcinomatous components: A case report

Okamoto H *et al.* Multiple carcinosarcomas of the esophagus

Hiroshi Okamoto, Hiroshi Kikuchi, Hiroshi Naganuma, Takashi Kamei

Abstract

BACKGROUND

Carcinosarcoma (spindle cell carcinoma) of the esophagus is an extremely rare event: the etiology and origins of this neoplasm have not yet been determined

components. We report a case of an 84-year-old male with **multiple carcinosarcomas** occurring in the **esophagus** and stomach. Endoscopically, a bulky pedunculated polypoid lesion was observed in the middle of the **esophagus** and a huge discoid lesion in the lesser curvature. The patient received **esophageal** endoscopic mucosal resection, and the specimen
