Mar 29, 2019 · **Müller-Weiss disease** is an uncommon idiopathic condition characterized by dorsolateral collapse and fragmentation of navicular bone. Most patients present as a chronic mid and hindfoot pain with deformity. We **report** a **case** of 61-year-old women with a progressive mid-foot pain, diagnosed as **Müller-Weiss disease**.

## Flatfoot in Müller-Weiss syndrome: a case series

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3459784>

Aug 01, 2012 · However, **Müller-Weiss** syndrome is a very rare **disease**, and there are few studies of this **disease** in terms of open surgical treatment in more than one patient. We adopted open operative methods to manage six patients with **Müller-Weiss** syndrome, and all subsequently achieved bony fusion and a pain-free condition.
