SPECIFIC COMMENTS TO AUTHORS

The writing requires significant editing for grammar and word usage. Also, I'm not comfortable with MSS CRC being called a "subset" of MSI. Maybe the terminology differs in different countries, but here the two are considered separate entities.

SPECIFIC COMMENTS TO AUTHORS

This review manuscript aims to present and discuss the beneficial effects of antiviral therapy to colorectal cancer metastasized to liver. This work is of potential interest for specialized oncologists. However, the manuscript cannot be accepted for publication in its present form, since there are some points requiring correction or revision, as follows.

1. The text requires extensive linguistic revision. There are several grammar/syntax/typo errors (i.e., page 3: line 6; page 3: line 23; page 5: line 1; page 7: line 6). 2. In most cases, literature is out of date. It is better to include more recent studies. In addition, several references need corrections (i.e. 1, 8, 15, 20, 21)

SPECIFIC COMMENTS TO AUTHORS

I think there should be more references to support the hypotheses in “Absent liver metastasis in CRC with HBV/HCV” section, the second paragraph of “Potential mechanistic clues” section, and the first paragraph line 1 to line 4 of “Antiviral therapy and immune system” section.
