SPECIFIC COMMENTS TO AUTHORS

This case report is very interesting. The case of extremely premature infants who accidentally entered the left upper extremity artery during peripheral puncture of the central venous catheter was very rare. Comments: 1. The title should be revised. "picc" should be changed to "PICC", and I suggest to change the title to "Arterial embolism caused by picc in very premature infants: A case report and literature review". 2. "1.6" is the follow-up, the title should included. 3. The manuscript required a minor language editing.

SPECIFIC COMMENTS TO AUTHORS

The case in this study is very rare, and the treatment of this case is successful. The figures should be moved to the end of the text. The conclusion section is missing in the main text. The manuscript should be updated according to the guideline of the case report of the journal. Reference list is OK.
