

Dear Editors and Reviewers:

Thank you for considering our manuscript entitled *“Successful Treatment of Life-threatening Hemoptysis and Paraplegia by Multidisciplinary Approach in Patient with Pulmonary, Hepatic and Spinal Metastatic Choriocarcinoma”* (Manuscript NO: 55482). The comments are valuable and helpful for revising and improving our paper. We have read the peer-review report and have revised our manuscript accordingly. The responses to the reviewers’ comments are as follows:

Response to Reviewer#1(Reviewer ID: 01467463):

Comment:*Short title: with the abbreviation “MDT in ...” does not define the content most precisely!*

Answer: We thank the reviewer for the comment. We made the suggested change in the revised manuscript.

Response to Reviewer#2(Reviewer ID: 02728252):

Comment:1.*The title should be shortened and rephrased (avoid repetition) likely as multidisciplinary treatment of life-threatening hemoptysis and paraplegia of patient with pulmonary, hepatic and spinal metastatic choriocarcinoma: A Case Report*

Answer: We appreciate the reviewer’s advice, we made modifications in the manuscript.

Comment:2. *Why the author used an abbreviation likely as GTD, no value and should be deleted.*

Answer: The typo has been fixed.

Comment:3. *A summary table for the case is recommended to describe demographic data, physical laboratory and imaging data.*

Answer: We thank the reviewer for the comment. We made the suggested change in the revised manuscript.

Comment:4. *Figures with a high resolution for lung computed tomography and spinal magnetic resonance imaging are mandatory and it is preferable to use arrows for clarification.*

Answer: We thank the reviewer for your advice, we made modifications in the

manuscript.

Besides, according to the editorial office's comments, we now provide the original figures and text portions can be reprocessed by the editors. The title has been shortened and we have completed the CARE checklist.

We hope that the revised manuscript can be acceptable and look forward to hearing from you soon.

Best regards!

Yours sincerely,

Yang Sun, MD
