Sarcomatoid carcinoma is a rare type of gallbladder cancer with no specific clinical manifestation. The final diagnosis depends on pathological and immunohistochemical examination. Sarcomatoid carcinoma is characterized by early lymphatic metastasis, rapid progression, a high short-term recurrence rate, and a worse prognosis than adenocarcinoma.

Sarcomatoid carcinoma

Sarcomatoid carcinoma, sometimes referred to as pleomorphic carcinoma, is a relatively uncommon form of cancer whose malignant cells have histological, cytological, or molecular properties of both epithelial tumors and mesenchymal tumors. It is believed that sarcomatoid carcinomas develop from more common forms of epithelial tumors.
