Successful management of tubular colonic duplication using a laparoscopic approach: A case report and review of the literature

Li GB *et al.* tubular colonic duplication

Gan-Bin Li, Jia-Gang Han, Zhen-Jun Wang, Zhi-Wei Zhai, Yu Tao

Abstract

BACKGROUND

Alimentary duplication is a rare congenital disease with a reported incidence

Laparoscopic resection of adult colon duplication causing ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4735015>

Feb 21, 2016 · We describe an adult case of **ascending colon duplication resected by laparoscopic** right colectomy. We conclude that **gastrointestinal duplications** should be included in the differential diagnosis of all abdominal and submucosal cystic lesions and that **laparoscopy** is a preferred **approach** for the **surgical treatment** of **gastrointestinal duplications**.

Colonic duplication: A case report and literature review ...

https://www.researchgate.net/publication/23257549_Colonic_duplication_A_case_report...

The authors report a case of **sigmoid colonic duplication successfully treated by laparoscopic resection** under the guidance of **intraoperative colonoscopy**.

Laparoscopic approach to non-communicating intestinal ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5887447>

However, the mucosa and the rest of the **colon** appeared normal. Since pain became more intense **laparoscopy** was performed and a cystic mass dependent on the cecum was discovered. **Laparoscopic hemicolectomy** was performed. Patient underwent full recovery. On follow up controls, pathology described **intestinal cystic duplication** of the **colonic wall**.

(PDF) Tubular colonic duplication in an adult: case report ...

https://www.researchgate.net/publication/325156762_Tubular_colonic_duplication_in_an...

We describe a **case of tubular colonic duplication** in an adult. The patient was a 25-year-old woman who presented with abdominal pain, bloating, nausea, and emesis for 3 days.

Colonic duplication: A case report and literature review ...

<https://www.researchgate.net/publication/23257549...>

A case of tubular colonic duplication, sigmoid colon diverticulum, and lumbar anterior spina bifida in a 28-year-old man was diagnosed as split notochord syndrome.

Laparoscopic approach to non-communicating intestinal ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5887447>

We report a case of a female patient with colonic duplication cyst resolved with laparoscopic approach. CASE REPORT Patient is a 36-year-old woman without any past medical history, she was complaining of lower abdominal pain for about a month.

Case report - ScienceDirect.com

<https://www.sciencedirect.com/science/article/pii/S2049080119300123>

Tufiño et al. have treated a duplication cyst attached to the cecum and the ascending colon with a laparoscopic approach. They claim laparoscopic right hemicolectomy for duplication cyst, as for malignancies, has the advantages of minimal invasion, faster recovery, and a lower rate of wound infection, and it can achieve the same degree of radicality and prognosis as open right hemicolectomy ...
