SPECIFIC COMMENTS TO AUTHORS

This is a well-written article about colonic duplication

SPECIFIC COMMENTS TO AUTHORS

Dear Authors, Your case report is interesting but the case presentation should be more discursive with less paragraphs

SPECIFIC COMMENTS TO AUTHORS

There are numbers and comments within the discussion where the bibliographic citation should be incorporated. Ex: "Nearly 90% of patients undergo surgical treatment and 68.5% of duplication are tubular" (????) Finally, perhaps a systematic review with all available cases would make this paper more tempting.
