SPECIFIC COMMENTS TO AUTHORS

This brief study is designed to explore the efficacy of ultrasound-guided selective proximal and distal brachial plexus block in rapid rehabilitation surgery for hand trauma. The aim of the study is clear, and methods are reasonable. Sample size is acceptable. In the results section, the tables are good, but should be moved to the end of the manuscript. A minor language polishing should be corrected.

SPECIFIC COMMENTS TO AUTHORS

Very interesting surgical technique, useful, and practical. The manuscript is well written.

I recommend to accept it for publication after an editing.
