SPECIFIC COMMENTS TO AUTHORS

55867 To Authors, The manuscript titled “Novel computerised psychometric tests as primary screening tools for the diagnosis of minimal hepatic encephalopathy ” was reviewed. This study has mentioned about computerised psychometric tests in order to screen of Minimal hepatic encephalopathy easily and quickly and early diagnose and follow up of it as a critical neurocognitive complication of decompensated liver cirrhosis and portosystemic shunting. However, there are some minor mistakes need to correct before publishing. First, the abbreviations in the abstract should be checked. They should be rewritten together with an explanation (eg. PHES in abstract) .You can use abbreviation after third using. Second, Table 2 which mentioned in the text was not found in tables. It probably should be corrected as Table 1 in the text.
