IgG4-related disease: case report and literature review

https://www.researchgate.net/publication/280589629_IgG4-related_disease_case_report...

IgG4-related **disease** (IgG4-RD) is relatively a new growing entity of immune-mediated origin, characterized by a mass-forming lesion, the infiltration of ...

[PDF] IgG4 disease of the ear: Report and review

<https://journals.sagepub.com/doi/pdf/10.1177/2050313X18791428>

IgG4-related **disease** (IgG4-RD) is a recently described, immune-mediated, **multi-organ** (in 60%–90% of cases)¹ condition. It has been misdiagnosed in the past due to its similarity to other pathologies and its widespread, unspe- ... IgG4 **disease** of the ear: **Report** and **review** Carolina Wuesthoff¹, Alexandra Allende^{2,3}

Coronary periarteritis in a patient with multi-organ IgG4 ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4391803>

This particular manifestation is infrequently reported, and we are aware of only 10 **case** reports in the **literature**, nearly all from Japan, that specifically describe IgG4-related coronary periarteritis [13,14,15,16,17,18,19,20,21,22]. Based on these reports, the mean age of presentation was 71.2 years (range 62–84 years) with 90% being male.

Igg4-Related Disorder and Endocrine Diseases: A Review of ...

<https://www.semanticscholar.org/paper/Igg4-Related-Disorder-and-Endocrine-Diseases:-A...>

IgG4-related disorders (IgG4-RD) are a new entity of **multi-organ** disorders that share common fibro-inflammatory histopathologic characteristics and elevated IgG4 levels in serum and tissue. Autoimmune pancreatitis and Mikulicz syndrome are major entities, however many syndromes are part of IgG4-RD including eosinophilic angiocentric fibrosis, fibrosing mediastinitis, hypertrophic ...

[\[PDF\] IgG4 disease of the ear: Report and review](#)

<https://journals.sagepub.com/doi/pdf/10.1177/2050313X18791428>

IgG4-related disease (IgG4-RD) is a recently described, **immune-mediated**, **multi-organ** (in 60%–90% of cases)¹ condition. It has been **misdiagnosed** in the past due to its similarity to other pathologies and its widespread, unspecific, seemingly disjointed symptomatology. Its description has enabled the inclusion and **connection** of unspecific

[IgG4 Related Cardiac Disease - ncbi.nlm.nih.gov](#)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3846080>

IgG4-related systemic disease is an **inflammatory disorder** that can affect many **organs**. This case report describes a patient who in 2004 was found to have an inflammatory pseudotumor with **IgG4 pathology**. Over the next 3 years, **visual symptoms** responded well to recurrent courses of prednisone.

IgG4-related disease

Chronic Inflammatory Condition

IgG4-related disease, formerly known as IgG4-related systemic disease, is a chronic inflammatory condition characterized by tissue infiltration with lymphocytes and IgG4-secreting plasma cells, various degrees of fibrosis and a usually prompt response to oral steroids. In approximately 51–70% of people with this disease, serum IgG4 concentrations are elevated during an acute phase.
