P.I. / Cod. Fisc. 01811110020

Vercelli, April 6th, 2020

I certify that the study "Effectiveness and safety of antithrombotic strategies in elderly with acute myocardial infarction" by Rondano et al was reviewed by me and that statistical methods were correctly applied according to the kind of variables. No sample size calculation was carried on "a priori" because of the retrospective nature of the study.

Sincerely,

Eraldo Occhetta, MD
