**Massive pulmonary haemorrhage due to severe trauma treated with repeated alveolar lavage combined with extracorporeal membrane oxygenation: A case report**

Bei-Yuan Zhang, Xian-Cheng Chen, Yong You, Ming Chen, Wen-Kui Yu

## Abstract

### BACKGROUND

Massive pulmonary haemorrhage can spoil the entire lung and blocking the airway in a short period of time due to severe bleeding, and quickly lead to death. Alveolar lavage is an effective method for hemostasis and airway maintenance. However,
