

## PEER-REVIEW REPORT

**Name of journal:** World Journal of Orthopedics

**Manuscript NO:** 56026

**Title:** Supernumerary Brachioradialis: Anatomical Relationships and Clinical Relevance, a single case report study, Revision 1

**Reviewer's code:** 02445816

**Position:** Editorial Board

**Academic degree:** BSc, MSc, PhD

**Professional title:** Assistant Professor, Physiotherapist

**Reviewer's Country/Territory:** Greece

**Author's Country/Territory:** Switzerland

**Manuscript submission date:** 2020-04-20

**Reviewer chosen by:** Jia-Ping Yan

**Reviewer accepted review:** 2020-05-27 22:35

**Reviewer performed review:** 2020-06-02 23:04

**Review time:** 6 Days

#### **SPECIFIC COMMENTS TO AUTHORS**

A very well-written and informative paper on an anatomical variation of the brachioradialis muscle. The figures supplement the text in an excellent manner, providing clear information on the site and extent of injury, its management and follow up. Also, sufficient literature review on the topic has been performed. Overall, very useful information is provided for the orthopaedic medical practitioner and healthcare provider in general on the identification and management of this rather rare entity, which if not sufficiently managed, can result in a compromise in the functional ability of the upper limb.

#### **SPECIFIC COMMENTS TO AUTHORS**

This is case report of an anatomical variance of a brachioradialis muscle with two muscle bellies & tendons and a common insertion. Although this case report is well documented, it is only a description of an anatomical variance observed coincidentally after a forearm laceration and does not present any clinical relevance.
