[PDF] Non-Emergent, Elective Medical Services, and Treatment ...

<https://www.cms.gov/files/document/cms-non...>

To aggressively address COVID-19, CMS recognizes that conservation of critical healthcare resources is essential, in addition to limiting exposure of patients and staff to the virus that causes COVID-19. CMS also recognizes the importance of reducing burdens on the existing health system and

Caring for patients with pain during the COVID-19 pandemic ...

<https://onlinelibrary.wiley.com/doi/10.1111/anae.15076>

During the COVID-19 pandemic there is a risk of chronic pain patients failing to receive important treatment due to reallocation of resources and reduction in services, to both limit the spread of infection and to deal with saving lives of those infected. Chronic pain patients may also be at increased risk of COVID-19 due to multiple factors.

Cancer Care During the COVID-19 Pandemic | ESMO

<https://www.esmo.org/for-patients/patient-guides/...>

Apr 08, 2020 · **COVID-19** is short for 'Coronavirus Disease 2019'. It is an illness that is caused by a new, fast-spreading coronavirus called SARS-CoV-2. Coronaviruses are a family of viruses that cause disease in mammals and birds but can occasionally evolve to affect humans. In December 2019, the first human cases of **COVID-19** caused by SARS-CoV-2 were reported in Wuhan, China.
