#### **SPECIFIC COMMENTS TO AUTHORS**

1. this study showed that French physicians are devoted to take place in the national plan against COVID-19, the French Spine Surgery Society (SFCR) therefore decided to elaborate specific guidelines for management of spinal disorders during COVID-19 pandemic in order to prioritize management of patients. more importantly, the authors hope that the guidelines formulated by the SFCR and the experience of spine surgeons from a cluster region will be helpful in order optimizing the management of patients with urgent spinal conditions during the pandemic. 2. this study maybe have some guiding significance for the spine surgery patients with or without COVID-19 during COVID-19 pandemic, it guides many surgeons based on the three levels of spinal trauma in this manuscript to treat with the COVID-19 infection patients. 3. this study only had two case of the spinal trauma patients with COVID-19 infection, therefore, the conclusion of this study may be uncredible.
