SPECIFIC COMMENTS TO AUTHORS

Good case presentation, although very short follow-up. I have minor concerns. 1) Paragraph TREATMENT, first sentence: "The patient was prescribed donepezil 5mg q.n.". Could authors clarify the meaning "q.n."? 2) Please provide references of the evaluations used (MMSE, Montreal Cognitive Assessment Basic (MoCA-B), CDR, Global Deterioration Scale (GDS), activities of daily living ADL), and references to the chinese validation of the assessments. 3) Figure: the Figure Legends are confusing and do not match the panels. 4) The panel "(5)" (lower right) is a table, not a figure. 5) Should specify in the table's header row: "Postoperative at 3 months".
