

## PEER-REVIEW REPORT

**Name of journal:** World Journal of Gastrointestinal Endoscopy

**Manuscript NO:** 56183

**Title:** Nonsteroidal anti-inflammatory drug effectivity in preventing post-endoscopic retrograde cholangiopancreatography pancreatitis: Systematic review and meta-analysis

**Reviewer's code:** 01799104

**Position:** Editorial Board

**Academic degree:** AGAF, MD

**Professional title:** Associate Professor, Doctor

**Reviewer's Country/Territory:** Taiwan Province, China

**Author's Country/Territory:** Brazil

**Manuscript submission date:** 2020-04-20

**Reviewer chosen by:** Jia-Ping Yan

**Reviewer accepted review:** 2020-05-25 04:30

**Reviewer performed review:** 2020-06-06 00:35

**Review time:** 11 Days and 20 Hours

<b>Scientific quality</b>	<input type="checkbox"/> Grade A: Excellent <input type="checkbox"/> Grade B: Very good <input checked="" type="checkbox"/> Grade C: Good <input type="checkbox"/> Grade D: Fair <input type="checkbox"/> Grade E: Do not publish
<b>Language quality</b>	<input type="checkbox"/> Grade A: Priority publishing <input checked="" type="checkbox"/> Grade B: Minor language polishing <input type="checkbox"/> Grade C: A great deal of language polishing <input type="checkbox"/> Grade D: Rejection
<b>Conclusion</b>	<input type="checkbox"/> Accept (High priority) <input type="checkbox"/> Accept (General priority) <input checked="" type="checkbox"/> Minor revision <input type="checkbox"/> Major revision <input type="checkbox"/> Rejection
<b>Re-review</b>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
<b>Peer-reviewer statements</b>	Peer-Review: <input checked="" type="checkbox"/> Anonymous <input type="checkbox"/> Onymous Conflicts-of-Interest: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

#### **SPECIFIC COMMENTS TO AUTHORS**

Although there have been several published meta-analysis discussing PEP, they mostly focused exclusively on types of medication, timing or route of administration. The authors made explicit analysis on all these topics in the same article. They also included only RCT data which made the results more robust. One major concern is that you may not need to discuss the dosage of each NSAID. According to the pharmacokinetics and pharmacodynamics, each drug has its own recommended dose. Comparing different medications with same dose category doesn't make any sense. You may explore different doses with the same drug.
