

## PEER-REVIEW REPORT

**Name of journal:** World Journal of Clinical Cases

**Manuscript NO:** 56355

**Title:** Typical and atypical Coronavirus Disease 2019 computed tomography findings

**Reviewer's code:** 05039108

**Position:** Associate Editor

**Academic degree:** MD, PhD

**Professional title:** Professor

**Reviewer's Country/Territory:** China

**Author's Country/Territory:** Italy

**Manuscript submission date:** 2020-04-26

**Reviewer chosen by:** Ya-Juan Ma

**Reviewer accepted review:** 2020-06-21 10:28

**Reviewer performed review:** 2020-06-25 07:02

**Review time:** 3 Days and 20 Hours

<b>Scientific quality</b>	<input type="checkbox"/> Grade A: Excellent <input type="checkbox"/> Grade B: Very good <input checked="" type="checkbox"/> Grade C: Good <input type="checkbox"/> Grade D: Fair <input type="checkbox"/> Grade E: Do not publish
<b>Language quality</b>	<input type="checkbox"/> Grade A: Priority publishing <input checked="" type="checkbox"/> Grade B: Minor language polishing <input type="checkbox"/> Grade C: A great deal of language polishing <input type="checkbox"/> Grade D: Rejection
<b>Conclusion</b>	<input type="checkbox"/> Accept (High priority) <input type="checkbox"/> Accept (General priority) <input type="checkbox"/> Minor revision <input checked="" type="checkbox"/> Major revision <input type="checkbox"/> Rejection
<b>Re-review</b>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<b>Peer-reviewer statements</b>	Peer-Review: <input checked="" type="checkbox"/> Anonymous <input type="checkbox"/> Onymous Conflicts-of-Interest: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

#### **SPECIFIC COMMENTS TO AUTHORS**

1.This review systematically illustrated typical and atypical CT findings of COVID-19, saying that the most frequent chest CT findings are GGO, consolidations, vascular enlargement, crazy paving, interlobular septal thickening and air bronchogram. However, the articles which have similar topics are not uncommon, so this review article may be not innovative enough. 2.The aim of this review is to illustrate typical and atypical CT findings of COVID-19. It can help radiologists recognize high suspicious findings of COVID-19 on chest CT, which is important for initial diagnosis and management of COVID-19 patients. 3.There is a small spelling mistake in this article. In the Cavitation section on page 6 of the article, "addiction" should be changed to "addition " 4. In order to make the article look more organized, each subtitle can be labeled.
