Easy Fixation Effects the Prevention of Peterson's Hernia and Roux Stasis Syndrome

Jian-Zhong Wu, Hajime Orita, Shun Zhang, Hiroyuki Egawa, Yukinori Yube, Sanae Kaji, Shinichi Oka, Tetsu Fukunaga

Abstract

BACKGROUND

Laparoscopic distal gastrectomy (LDG) for gastric cancer has been progressed and popular in Japan, since it was first described in 1994. Several reconstruction methods can be adopted according to remnant stomach size, and balance of pros and cons. Roux-en-Y (R-Y) reconstruction is a one of standard options after LDG. Its complications include Petersen's hernia and Roux stasis syndrome.
