SPECIFIC COMMENTS TO AUTHORS

In this study, the authors claimed to have developed a method to decrease the development of Petersen's hernia and Roux stasis syndrome. However, there are some concerns that should be addressed. 1. A illustration of the surgical procedure should be provided to deepen the understanding of this method. 2. In the Results section, more information should be provided instead of two Tables. 3. In this discussion section, the authors should compare the currently widely used method of narrowing Petersen's defect with this method. The pros and cons of all methods should be discussed.
