SPECIFIC COMMENTS TO AUTHORS

Specific comments: 1. Please change "disorders.Moreover" to "disorders. Moreover". 2. Please change "Pittsburgh Sleep Quality Index" to "Pittsburgh Sleep Quality Index". 3. Please provide more information about your hospital, e.g. is it a tertiary hospital with a specialized neurosurgical unit? 4. How was sample size determined? There is currently no evidence of power calculation. The present sample appears small and limited to a convenience sample. 5. Please recheck "Cronbach's $\alpha = 0.83$ ". 6. Please do a close edit of the entire manuscript for language and grammar. It should be 'themselves' and not 'themselves'. Do you know 'implicit' rather than 'unimplied'. 7. What is "gave unimplied answers to the questions that the interviewees did not understand"? Please rephrase. 8. Please report the exact P-values rather than simply $P < 0.05$. Statistical results should include confidence intervals or exact P values, even for non-significant results. All statistical results should be reported according to the SAMPL Guidelines (Statistical Analyses and Methods in the Published Literature). 9. Rather than present the data as "t=-0.786, P= 0.017", you should present the exact P-value and its associated 95% CI. 10. The study limitations and areas for future work should be at least briefly discussed. For example, a more systematic examination of sleep disturbance is warranted to inform the development of better symptom management programs in this population. 11. Please recheck this reference, "4.
