SPECIFIC COMMENTS TO AUTHORS

Dear editor, Firstly, thank you for the evaluation chance of this article. I have reviewed all the reviewal process and all the resources of this article. This article has been constructed on a well object and it is a good study. However, I must point out that, there are so many parts needed to be revised in the study. Background focused on classic OLT. However, there is an OLT related to gout. Should be revised. It would be better to state what treatment is given and how much is followed in the case summary section. Most of the background focused on classic OLT. However, there is an olt related to gout. Should be revised. If possible, follow-up direct radiography should be added. The discussion is inadequate. Diagnosis and treatment difficulties and treatment options and treatment results of gout located in the talus are not discussed sufficiently. The following article should be read and a paragraph about the surgical treatment of gout should be added with reference to this article (Öztürk R, Atalay İB, Bulut EK, Beltir G, Yılmaz S, Güngör BŞ. Place of orthopedic surgery in gout. Eur J Rheumatol 2019; 6(4): 212-5). In addition, the literature should be scanned in terms of gut cases with talus and these cases should be included in the discussion section. Maybe even a table can be made. The authors should discuss their cases in the light of the literature. The authors did not refer to the case of gout in any talus, and in the article they focused mainly on OLT. Sincerely..
