SPECIFIC COMMENTS TO AUTHORS

Congratulation to authors for the well-written report. I enjoyed reading very much. I have only one comment about the conclusion. At the end of the conclusion on Page 11, you stated "Many patient management issues remain unresolved due to the rarity of the disease and require further research.". However, when I read through the report, I cannot see the concern except rarity. The authors may need to address the unresolved issues in the text for clarity.
