**Manuscript Type:** THERAPEUTIC AND DIAGNOSTIC GUIDELINES

**Hunting down the dominating subclone of cancer stem cells as a potential new therapeutic target in multiple myeloma: An artificial intelligence perspective**

Lee LX *et al.* AI approach to cancer subclones

Lisa X Lee, Shengwen Calvin Li

## Abstract

The development of single-cell subclones, which can rapidly switch from dormant to

## Cancer stem cells in basic science and in translational ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4345016>

Feb 25, 2015 · Introduction. The principle concept of **cancer stem cells** (CSC) has gained increasing acceptance in recent years [1-10].By definition, CSC exhibit self-renewal activity and long-term **cancer**-propagating capacity [1-9].By contrast, more mature clonal **cells** in the same neoplasm have limited proliferative **potential**.

## $\beta$ Molecular Pathways: Novel Approaches for Improved ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4316382>

Feb 01, 2015 · Hh pathway activation in **cancer stem cells**. Lineage tracing studies have demonstrated the existence of a sub-population of tumor **cells** exhibiting **stem**-like properties (36-38). These tumor-initiating or **cancer stem cells** (CSCs) exhibit self-renewal, enhanced tumor initiation, and differentiation into transiently-amplifying **cells** that populate ...

## CLONAL EVOLUTION IN CANCER

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3367003>

**Cancer** is a major cause of mortality throughout the world and despite the extraordinary amount of effort and money expended over the past several decades, successful eradication and control of advanced disease remains elusive 1. In parallel, our understanding of **cancer** biology and genetics has changed beyond recognition 2. The translation of **cancer** genomics to **cancer** therapy needs to accommodate ...

<https://jhoonline.biomedcentral.com/articles/10.1186/s13045-015-0113-9> ▼

Feb 25, 2015 · Since their description and identification in leukemias and solid tumors, **cancer stem cells** (CSC) have been the subject of intensive research in translational oncology. Indeed, recent advances have led to the identification of CSC markers, CSC targets, and the preclinical and clinical evaluation of the CSC-eradicating (curative) **potential** of various drugs.
