SPECIFIC COMMENTS TO AUTHORS

Dear Editor: I have read with interest the manuscript entitled " Lateral position intubation followed by EUS-guided angiotherapy in acute esophageal variceal rupture: A case report" by Ting-Ting and coworkers. The case report is very interesting but it fits better in other BPG journals such as World Journal of Endoscopy and World Journal of Gastrointestinal endoscopy, World journal of case report. The manuscript needs minor language revision

SPECIFIC COMMENTS TO AUTHORS

very nice case and well written manuscript discussing all details. However, i have minor comment regarding the procedure of EUS guided injection: 1. during active bleeding you can visualize varices clearly by EUS. however, how did you identify the bleeding varix by EUS? 2. the figures are nor clear whether it is the varix or the perforator vessels or paraesophageal collaterals? please attach clear figures including the injection procedure.
