

Dear Editor,

Thank you very much for your valuable comments on the article. According to your Suggestions, we have made the following modifications, hoping to meet the requirements of World Journal of Clinical Cases.

Answer of Scientific Quality: I have checked the comments written by the science editor. I have revised the article in the following aspects: 1) I improve my background and introduction by adding information such as: the number of cases and deaths in china and the emerging countries globally. 2) I replace the descriptors: duration of hospitalization for "hospitalization" and speed of viral shedding for "Viral transmission" in keywords. 3) I add the dates corresponding to the data collection in methods in the background. 4) In the materials and methods, I give space between the criteria and conditions and remove the numbers that are inside the parentheses. 5) I add two self-citations in the 23 references. 6) I provide the original pictures and documents in the figures. I prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor. 7) I add the "article highlights" section in the manuscript .8) I add some references and provide the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references.

Answer of Language Quality: I resolve the language issues in the manuscript based on the peer review report. Native-English speaker edit the manuscript for grammar, sentence structure, word usage, spelling, capitalization, punctuation, format, and general readability.

If there have any questions, please do not hesitate to contact me at any time. Looking forward to your reply.

Your sincerely,  
Hongliang Wang
