## Helicobacter pylori-negative Russell body gastritis: Case ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3063919>

Mar 07, 2011 · Russell body gastritis is an unusual form of chronic gastritis characterized by the permeation of lamina propria by numerous plasma cells with eosinophilic cytoplasmic inclusions. Very few cases have been reported in the literature; the majority of which have shown **Helicobacter Pylori ( H. pylori ) infection, thus suggesting a correlation between plasma cell presence and antigenic stimulation by H. pylori .**

**Abstract**

**BACKGROUND**

Russell body gastritis (RBG) is very rare type of chronic inflammation of gastric mucosa. The pathologic hallmark of the disease is Russell bodies (RB) which represent accumulation of eosinophilic cytoplasmic inclusions in endoplasmic reticulum of mature plasma cells (Mott cells). Most published cases are associated with *Helicobacter pylori* infection because of correlation between plasma cell activation and antigenic
