Multipotent Mesenchymal Stromal Cells for the Prophylaxis ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3253492>

The efficacy and the safety of the administration of multipotent mesenchymal stromal cells (MMSCs) for acute graft-versus-host disease (aGVHD) prophylaxis following allogeneic hematopoietic cell transplantation (HSCT) were studied. This prospective clinical ...

Clinical Translation of Mesenchymal Stromal Cell Therapy ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6881464>

Nov 21, 2019 · Graft versus host disease (GVHD) is a common condition in patients subjected to allogeneic hematopoietic stem cell transplantation (HSCT). The immune cells derived from the grafted stem cells attack recipient's tissues, including those from the skin, liver, eyes, mouth, lungs, gastrointestinal tract, neuromuscular system, and genitourinary tract, may lead to severe morbidity ...

Multipotent Mesenchymal Stromal Cells for Autoimmune ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3076365>

Jul 17, 2008 · Summary: Multipotent mesenchymal stromal cells (MSC) are under consideration for the treatment of autoimmune disease (AD) based on their in vitro antiproliferative properties, efficacy in animal models, apparent low acute toxicity, and the early positive anecdotal outcomes in human acute graft versus host disease.

Basic Study

Immunophenotypic characteristics of multipotent mesenchymal stromal cells that affect the efficacy of their use in the prevention of acute graft versus host disease

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6558336>

MSCs represent a **multipotent**, heterogeneous, and nonhematopoietic cell population that can be derived from bone marrow and expanded ex vivo in order to achieve sufficient numbers of **cells** for **use** as clinical cell therapy []. More recently, adipose tissue, placenta, umbilical cord, and dental pulp were also recognized as sources of **multipotent** MSCs [].
