

Dear Reviewers

I totally agree that the message of the article, that is the need for personalized patient centered care in the field of Nephrology is not directly linked to the COVID-19 pandemic.

The reason that I accentuated the pandemic is that it creates directly and indirectly a financial crisis and in that sense urges us to be as cost effective as possible in the field of Health Care.

In that sense, I changed the title and omitted the reference to the COVID 19.

Respectfully Yours

Dimitra Bacharaki

MD PhD

Consultant Nephrologist

Attikon University Hospital of Athens
