### A Rare Case of Insulinoma Presenting with Postprandial ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4228950>

We present a rare case of an **insulinoma** in the setting of verified **postprandial hypoglycemia** with **elevated insulin** and C-peptide levels. Although **insulinomas** typically **present** with **fasting hypoglycemia**, it is important to consider **insulinoma** in the **differential** diagnosis of **patients presenting** exclusively with **postprandial hypoglycemia**.

### Co-existence of insulinoma and diabetes: A case report

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4156181>

Jul 10, 2014 · **Insulinoma** is a rare **tumor** originating from **insulin-synthetizing pancreatic beta cells** which clinically manifests hypoglycemia. The current study **presents** the case of a patient with a one month history of diabetes, and a tumor of the pancreatic head diagnosed at the Regional Hospital of **Lomza** (Lomza, Poland).

However, there have been no case reports of insulinoma manifesting as postprandial hypoglycemia in which CGM was used throughout the diagnosis, before and after tumor resection. We herein report a case of insulinoma with **re-gional lymph node metastasis in a patient previously diag-nosed with reactive hypoglycemia due** to the presence of postprandial hypoglycemia. CGM suitably reflected ...

<https://jmedicalcasereports.biomedcentral.com/... ▾>

Jun 30, 2020 - Although insulinomas classically cause fasting hypoglycemia, they are also known to lead to postprandial hypoglycemia. In one review, **21%** of individuals with insulinomas experienced both **fasting and postprandial hypoglycemia**, whereas only **6%** ...

## Insulinoma

An insulinoma is a tumor of the pancreas that is derived from beta cells and secretes insulin. It is a rare form of a neuroendocrine tumor. Most insulinomas are benign in that they grow exclusively at their origin within the pancreas, but a minority metastasize. Insulinomas are one of the functional pancreatic neuroendocrine tumor group. In the Medical Subject Headings classification, insulinoma is the only subtype of "islet cell adenoma".
