

Good day.

We have revised the manuscript as per the review received. The pathogenesis of insulinoma was explained more in-depth and language has been re-edited by AJE. New language certificate is also provided. The title was changed to *Insulinoma presenting with postprandial hypoglycemia and a low body mass index– a case report*.

Thank you for Your review. We hope that current manuscript will be appropriate for the World Journal of Clinical Cases.

Cordially,

Dana Prídavková
