Treatment of nasal microcystic adnexal carcinoma with an ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4533210>

Introduction. **Microcystic adnexal carcinoma** (MAC) is a rare, locally aggressive type of adenocarcinoma with low-grade malignancy and extremely low metastatic ability (1–3). Since the first **report** of a MAC in 1982 by Goldstein et al (), only ~300 cases of MAC have been described to date. MACs are also known as sclerosing sweat duct carcinomas, eccrine epitheliomas and syringomatous carcinomas ...
